

# ADSL NID Compatibility

An Evolant™ Solutions Product

Corning  
Cable Systems

The chart below shows the compatibility between our ADSL Customer Premises Equipment (CPE) and different Network Interface Device (NID) options.

If the customer does not have one of the NIDs listed below, Corning Cable Systems has a solution. The SPS-H70-SR1 is an ADSL POTS Splitter Outdoor Ancillary Device that is attached to the point of demarcation at the customer premises. From the demarcation point, the twisted pair is jumpered over to the SPS-H70-SR1 where the signals are split into VOICE and DATA.

## CORNING CABLE SYSTEMS – NID PRODUCT LINE
